S.N: 09/322,677 Art Unit: 2764

#### DETAILED ACTION

- 1. This Office Action is the answer to the communication received on 4/10/2000 (the request for reconsideration), which paper has been placed of record in the file.
- Claims 1-68 are pending in this application. Claim 6 has been canceled.

#### Response:

- 3. Applicants' arguments received on 4/10/2000 have been fully considered but they are not persuasive with previous cited references, and newly found references.
- 4.1. Applicants assert that "the amended claims 1, 11,13-15, 30, 52, and 68, contain limitations nowhere shown in any of the prior art of record, including the cited reference (e.g. claim 1 was amended by the Preliminary Amendment dated January 12, 2000 to recite that each search listing is associated with "a modifiable bid amount that is independent of other components of the search listing." Independent claims 11,13-15, 30, 52, and 68 have been amended to include similar limitations.
- 4.2. The examiner submits that these limitations are inherent in the concept that Goto.com suggested in the article <u>published</u> on May 19. 1998, about \*GoTo.com announces first round of financing, totaling more than \$6 million, led by Draper Fisher

Jurvetson", indicates possession of that invention. It obviously sets forth the mode contemplated by the inventor of carrying out his invention in "Bidding for higher placement offers big benefit to advertisers ... Any advertiser can increase a bid for a listing in order to obtain a higher ranking", this feature inherently mentions about "a modifiable bid amount that is independent of other components of the search listing". Other related articles are cited to indicate that the concept in this application already disclosed for a 35 U.S.C.102(b)/103(a) rejection.

4.3. The examiner submits that the appropriate inquiry in determining whether a particular document constitutes "printed publication" within the meaning of 35 U.S.C. 102 is whether the document was 'sufficiently accessible" to one skilled in relevant art who exercised "reasonable diligence" and not whether one skilled in the art would be "highly likely" to discover document or references to it in course of research (E.I. du Pont de Nemours & Company v. Cetus Corp., 19 USPQ2nd 207); and claims that are anticipated by prior art reference are also obvious in view of that reference under 35 USC 103 (In re Baxter Travenol Labs, 21 USPQ 2nd 205); and anticipatory reference need not duplicate, word for word, what is in claims; anticipation can occur when claimed limitation is "inherent" or otherwise implicit

in relevant reference (Standard Havens Products Incorporated v. Gencor Industries Inc., 21 USPQ2d 1321).

- 4.4. Therefore, THIS ACTION IS MADE FINAL. See MPEP \$ 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
- 4.5. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

#### Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Because the claims in a pending application should be given their broadest reasonable interpretation; claims 1-68 are rejected on 35 U.S.C. 102(b) because the article <u>published on May 19, 1998</u>, about \*GoTo.com announces first round of financing,

totaling more than \$6 million, led by Draper Fisher Jurvetson", indicates possession of that invention. It sets forth the mode contemplated by the inventor of carrying out his invention in Bidding for higher placement offers big benefit to advertisers ... Any advertiser can increase a bid for a listing in order to obtain a higher ranking". Therefore, this article was published before the application date of the invention (May 28, 1999), in another word, the invention was described in a printed publication in this country, more than one year prior to the date of application for patent in the United States.
